Developer, Frontend

<https://olgatecreator.github.io/breazy/>

📅 january 2022 - current

React, React Hooks, Javascript, HTML, CSS, Framer Motion, React Transition Group, Jest, React Testing Library

- Built a responsive accessible web app in React with a mobile-first approach
- Collaborated with a friend learning UX and design using Trello
- Deployed at Github Pages
- Currently working on testing and refactoring CSS (styled-components)

ABOUT ME

After 5 years working as a manager in clubs in Cracow, I decided to use my time as a stay-at-home mum as an opportunity to fulfil my dream of becoming a programmer. I love to learn and don't give up, whether it's beating Sekiro on NG+ or making my app accessible and responsive. I've celebrated my time as a single developer while being able to choose technologies and tools that I've found interesting, and I feel more than ready to step my game up and start my journey in a commercial environment, solve real business problems and be a part of a team.

EDUCATION

Harvard CS50,
Eloquent Javascript,
Freecodecamp, Udemy

SKILLS

Linux, VSCode, Git, GitHub,
Javascript, **Typescript**
